PROFESSIONAL SUMMARY

Computer Science Engineering graduate skilled in web development, Python programming, software development, and problem-solving, with hands-on experience building web applications and machine learning projects. Completed a Web Development Internship focused on developing scalable, efficient, and real-world solutions. Eager to apply technical knowledge and problem-solving skills to develop innovative and innovative software solutions.

SKILLS

Languages : Python, C, JavaScript
Front-end : HTML5, CSS3, Tailwind CSS, React.js
Back-end / DB : MongoDB, MySQL
Tools : GitHub, VS Code, Jupyter Notebook
Soft Skills : Leadership, Time Management, Adaptability, Collaboration

PROJECTS & EXPERIENCE

Web Developer Intern – Vrishanksoft OPC Pvt. Ltd.

Feb 2026 – May 2026

- Gained hands-on experience in responsive web development using HTML, CSS, and JavaScript.
- Implemented interactive front-end functionalities to improve website performance.

SyncPad – Real-Time Collaborative Workspace

Technologies: React.js, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS

- Developed a real-time collaborative platform supporting code editing, shared notepad, and AI-based text & audio summarization.
- Implemented live synchronization and secure room-based collaboration using React.js, Node.js, Express.js, MongoDB, and Socket.io.
- Built a responsive UI with Tailwind CSS for seamless real-time collaboration.

Personal Portfolio Website

Technologies: HTML5, CSS3, JavaScript, Vercel

- Designed and developed a fully responsive personal portfolio website to showcase projects, skills, education and professional experience.
- Built an interactive and user-friendly interface with modern UI/UX principles, ensuring seamless navigation across devices.
- Optimized website performance and responsiveness for desktop, tablet and mobile users.
- Deployed the portfolio using Vercel and integrated direct access to projects, GitHub profile and professional information.

Early Prediction of Autism Spectrum Disorder Among Toddlers using Deep Learning

Technologies: Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy

- Developed a Deep Learning model using a Self Channel Attention (SCA) autoencoder and Deep Neural Network (DNN).
- Achieved high prediction performance for ASD detection with optimized feature selection.
- Benchmarked three algorithms (SCA, GA, BSO) and improved performance via attention-based feature selection.

EDUCATION

B.E. in Computer Science and Engineering

2022 – 2026

Shri Madhwa Vadiraja Institute of Technology and Management, Bantakal

Current CGPA: **7.88**

HACKATHONS & CERTIFICATIONS

- **HACKYUGMA** Hackathon – JNNCE, Shivamogga (2025).
- **HACKMITTEN** Hackathon – MITT, Mysore (2025).
- **AINNOVATION 2025_II** – Code4Bharat Hackathon – NMAMIT, Nitte (2025).
- Team Nominated for **Innovative Idea** at Manipal Biotech Hackathon (2025).
- **Learn C Programming** by CodeChef (Certification).
- **Top 5 Teams** – COMEDKAR Innovation Challenge (2025).
